

## ***Guest Driver Policy***

48 hours notice is required when a member plans to bring a guest driver. Upon arrival all guests must complete the necessary forms, including a medical history form and a tech sheet (if driving own car) before entering the Club. At completion of these forms the guest driver will be issued a yellow wristband signifying completion of forms and payment arrangements.

The guest driver must then see a track instructor. The track instructor will interview the driver to assess experience/capability and provide an orientation session. ALL guest drivers must go through orientation regardless of experience. Orientation sessions will be conducted at 8:30 and 11:20 on weekdays and 8:30 and 11:50 on weekends. The instructor may then do one of the following:

- ***Issue the guest driver a green band indicating the driver has been approved to drive without any further instruction.***
- ***Issue a green band to the host member indicating that the member has been approved to give further instruction to the guest and ride as a passenger with the guest until such time as the host member feels no further instruction is needed. At this point the host member must apply the green band to the guest's wrist.***
- ***Provide further instruction to the guest driver. This instruction may include a review of the track flags and basic track driving rules as well as a lead follow session on track.***
- ***ALL guest drivers must get approval from a track instructor before using the course.***
