

Dear Autobahn CC Member,

We are pleased to announce that we have retained Daniel Wohlfeil Design Ltd. to be the strategic architect and designer to assess our current clubhouse and the overall Autobahn CC experience. We selected Dan after looking at several architectural firms and feel he is the best fit, as a strategic thinker, and notable industry expert, with an effective hands-on approach. Dan and his team's specialty is clubhouse design and they also have a strong background in restaurant design, focusing on the dining and bar area experience. Dan served six years on the board of directors of the River Forest Country Club and was responsible for their full clubhouse re-design several years ago.

Highlights of Dan's recent work include a spectacular Scottish village style clubhouse and performance center at Mistwood Golf club in Romeoville which opened in 2016, the design and architect work for the Chicago Highlands Golf Club in Westchester IL, opening this summer, and the design and architect work for The Preserve at Oak Meadows in Addison IL, scheduled to open in 2020, among other notable projects. Dan and his team were also actively involved in the strategic long-range planning and major harbor and clubhouse renovation for the historic Grosse Pointe Yacht Club in Grosse Pointe MI in 2014.

Prior to the inception of his firm in 2008, Dan's 15-year tenure with McDonald's Corporation gave Dan the opportunity to lead the design concepts and development of more than 30,000 restaurants worldwide. Dan is acclaimed for his key role in the reinvention of the McDonald's drive-thru design where he introduced the concept of 'Carchitecture' as the design intent bridging design with consumer experience and operational efficiency. Dan holds five patents for this design.

Dan's primary focus at Autobahn will be with respect to a new or renovated clubhouse to ensure the club is positioned for adaptability and growth, while incorporating those amenities and experiences important to increasing clubhouse utilization and important for retaining and attracting Club members.

Please visit Dan's website at danielwohlfeildesign.com to get a better feel for his work. Dan will be visiting the Club frequently over the next several months and we encourage you meet Dan and give him your feedback. Dan's next visit to the Club will be at the Rally X event on January 20, 2018 from 11:00 a.m. to 3:00 p.m. Again, we encourage you to reach out to Dan and provide Dan with your feedback. If you cannot meet Dan at the Rally X event, Dan will be available on couple of set dates over the next month or so. We will let you know in advance those dates when Dan is available to meet at the Club.

This is an exciting time for Autobahn CC, and we want to be as transparent as possible as we develop our plans and move forward with the project. We look forward to sharing a more refined program of our direction and conceptual designs in the new future.

Autobahn Board of Managers
